**Premium Verification Worksheet**

This worksheet serves to verify the procedure(s) used by the insurer in the derivation of the Pure Premium at Advisory Pure Premium Rate Level reported in Part I, column (2). Please complete the following.

The Pure Premium at Advisory Pure Premium Rate Level (Part I, column (2)) was computed using the following methodology:<sup>1</sup>

2020 Policies	2021 Policies	2022 Policies	2023 Policies	
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	1. By summing
				$\left[ \begin{array}{c} \text{Exposure written} \\ \text{(or earned) for} \\ \text{all 2020 (2021 or} \\ \text{2022) policies} \end{array} \right] \times \left[ \begin{array}{c} \text{Approved advisory} \\ \text{pure premium} \\ \text{rates} \end{array} \right] \times \left[ \begin{array}{c} \text{Experience} \\ \text{Modification} \end{array} \right]$
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	2. By applying a consistent multiplicative factor (removing company expenses and deviations) across all classifications to your company's premium for 2020 (2021 or 2022) policies.
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	3. By applying a weighted average rate departure factor (removing company expenses and deviations) across all classifications to your company's premium for 2020 (2021 or 2022) policies.
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	4. By applying a ratio of insurer rates to pure premium rates by classification to your company's premium by classification for 2020 (2021 or 2022) policies.
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	5. By a method not described above. <sup>2</sup>

- 
1. Check one only for each policy year. If more than one method applies for a policy year, please select Method 5 and explain how the different methods were used.
  2. Please explain fully and in detail the procedures used to convert Premium at Insurer Level (Part I, column (1)) to Pure Premium at Advisory Pure Premium Rate Level (Part I, column (2)). Include all factors necessary for reconciliation and clearly define all figures shown.  
If necessary, email any additional supporting information to eSCAD@wcirb.com. Be sure to clearly indicate your reporting group/company name and code, data call code (shown in header of this page) and version # of the submission (search for this call in the Data Calls section after submission) in the email or in the attachment.

Fourth Quarter Calendar Year 2022 (CA-QT-4Q22)**

**Due Date: February 3, 2023  
Draft**

**Premium Verification Worksheet (Continued)**

**Please read the instructions prior to completing. If 2, 3, 4 or 5 is checked on Page 2, please answer (a) and (b) below.**

- a. The Pure Premium at Advisory Pure Premium Rate Level should be computed based on the Premium at Insurer Level (Part I, column (1)) excluding the average overall impact on premium of all rating plans except for the California Experience Rating Plan, such as schedule rating, merit rating, minimum premiums, surcharge plans, premium discount, expense and loss constants. Were all premium adjustments, other than adjustments due to experience modifications, removed or excluded from the premium to which the factor(s) or ratios was applied?

No

If "NO", please explain in detail below:

What was the combined percentage change to the Premium at Insurer Level (Part I, column (1)) of all the premium adjustments? (If this figure is different for written and earned premium, please report the figure pertaining to earned premium.)

- i. 2020 policies 0.00 %
- ii. 2021 policies 0.00 %
- iii. 2022 policies 0.00 %
- iv. 2023 policies (if applicable) 0.00 %

- b. What was the multiplicative factor (if 2 was checked), weighted average rate departure factor (if 3 was checked), or average ratio of insurer rates to pure premium rates (if 4 was checked) used? (If this figure is different for written and earned premium, please report the figure pertaining to earned premium.)

- i. 2020 policies 0.0000
- ii. 2021 policies 0.0000
- iii. 2022 policies 0.0000
- iv. 2023 policies (if applicable) 0.0000

If reporting as a combined insurer group basis, the factor should be representative for the group. If more than one rate per classification was used, please explain below how the average factor was computed. If the WCIRB standard classification system was not used, please explain below how you adjusted the premium in your insurer classification to the pure premium in the corresponding WCIRB standard classification.
