

WCIRB Connect[®] Digital Authorization Process

The WCIRB has integrated DocuSign[®] to modernize how insurers, agents and brokers request authorization from policyholders to access experience rating worksheets, inspection reports and Comprehensive Risk Summary (CRS)[™] reports through WCIRB Connect. The entire digital authorization process is now online and fully integrated with WCIRB Connect. In addition to providing significant savings in time and effort, the digital signature enhances the security and authentication of the authorization process.

Please note that experience rating worksheets and inspection reports are always available in WCIRB Connect to the insurer of record without any policyholder authorization requirement, and to agents and brokers after uploading documents verifying them as the policyholder's agent or broker of record.

How it works

DocuSign
If approved, PDF of completed Letter of Authorization is emailed
